

How to Change Google Password

<https://myaccount.google.com/security#signin>

1. Click on the link above
2. Sign in if you aren't already.

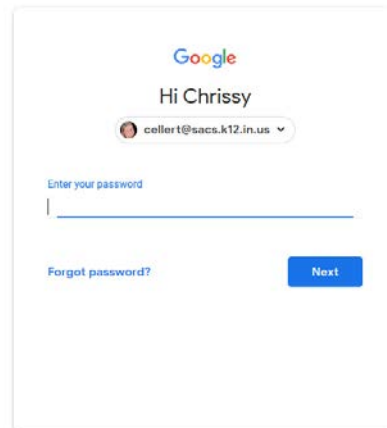

Signing in to Google

Set your account sign-in and recovery options.

You can sign in with a password (what most people choose), or add 2-Step Verification, which sends a code to your phone as an extra security step.

If you forget your password or something else goes wrong, you can use a recovery email or recovery phone number to [get back into your account](#).

[SIGN IN](#)

3. Click in the circled area below near Password

Signing in to Google

Control your password and account access, along with backup options if you get locked out of your account.

Make sure you choose a strong password

A strong password contains a mix of numbers, letters, and symbols. It is hard to guess, does not resemble a real word, and is only used for this account.

Password & sign-in method

Note: To change these settings, you will need to confirm your password.

Password

Last changed: May 25, 2012

4. You will be prompted to sign in again to verify it is really you. Once you've done that enter your new password with minimum 8-character new password using at least 1 capital letter, 1 symbols and 1 number – Example Hom3sTe@d.
